Melecio Laurente

IT Student · Developer

24-13012@lcctanauan.edu.ph | github.com/24-13012-rgb | 24-13012-rgb.github.io/portfolio

PROFILE

IT student and developer who builds systems people actually use, from point-of-sale and inventory to ticketing and library management. Looking for an on-the-job training or internship placement to keep building real software.

PROJECTS

ElectroPOS — POS and Inventory System for an Electric Store (Developer)

- Developed a point-of-sale and inventory system to handle sales transactions and stock monitoring.
- Built inventory tracking features to keep product quantities accurate and reduce manual record-keeping.

HR Ticket System — (Developer)

- Built a system for the HR office to manage employment records, payroll concerns, leave applications, benefits, and faculty and staff requests.
- Organized requests as tickets so HR can submit, track, and resolve concerns in one place.

School Library System — (Developer)

- Developed a library management system covering circulation (borrow, return, renew), patron records, and overdue lists.
- Added attendance, acquisition, inventory, file storage, serials, and reservation modules for books, rooms, and equipment.
- Built reports that can be printed or saved to Excel, plus utilities for settings, staff accounts, and an activity log.

Connect4 — Cross-Platform Game App (Developer)

- Created a Connect4 game app playable on both mobile and PC, allowing players to compete against a friend.
- Designed game logic and a simple, responsive interface that works across devices.

SKILLS

System Design · Database Design · Problem Solving · PHP · C · C++ · MySQL · Python · Java · HTML

CERTIFICATIONS — CISCO NETWORKING ACADEMY

- Network Technician Career Path
- Network Support and Security
- Network Addressing and Basic Troubleshooting
- Networking Devices and Initial Configuration
